

AMERICAN PETROLEUM INSTITUTE
DIVISION OF PRODUCTION
300 Corrigan Tower Building
Dallas 1, Texas

Wm. H. Strang
Director

December 1, 1955

Dr. M. King Hubbert,
Shell Research and Development Company,
Houston, Texas.

Dear Dr. Hubbert:

On behalf of our Southern District Program Committee and the officers of my district it is my pleasure to extend to you a most cordial invitation to address the 1956 annual meeting of the district. This meeting will be held at the Plaza Hotel, San Antonio, Texas, next March 7-9.

Your address would be scheduled for the morning of Thursday, March 8, as a feature of our General Session which would include one or two other addresses by men prominent in the petroleum industry, one of whom would be Mr. A. W. Thompson our API Vice-President for Production.

In asking me to act for them in this matter our Program Committee expressed the belief that you are eminently qualified to discuss future energy sources and it was the desire of the Program Committee that the scope of your address be left to your discretion. The committee did express the hope that you would deal with both the U. S. and world-wide situation in whatever proportion you saw fit.

The meeting will attract an attendance of approximately 1,000 individuals representative of the management and top technical bracket in the drilling and production industry in the Gulf Coast, Southwest Texas and Ark-La-Tex areas. You may be assured of their most interested attention to any remarks you may see fit to favor us with.

In the hope of an affirmative reply, I am

Sincerely yours,

/s/ Wm. H. Strang

Mr. Roy F. Carlson
Assistant Director
Division of Production
American Petroleum Institute
300 Corrigan Tower Building
Dallas 1, Texas

Dear Mr. Carlson:

Confirming our telephone conversation of this morning, I am sending by parcel post 300 copies of my address "Nuclear Energy and the Fossil Fuels." As I mentioned to you, we were working on such a short time schedule that a few minor errors escaped detection. These have been marked on one master copy.

I am also, by copy of this letter, sending two corrected copies to you at the API headquarters at the Plaza Hotel in San Antonio. The remaining 700 copies I shall bring with me tomorrow afternoon.

Yours sincerely,

M. KING HUBBERT

Mr. William H. Strang
Director
American Petroleum Institute
Division of Production
300 Corrigan Tower Building
Dallas 1, Texas

Dear Mr. Strang:

In accordance with my telephone conversation with you a few days ago, I am attaching two copies of the revised edition of my paper, "Nuclear Energy and the Fossil Fuels," which is to replace the earlier preliminary edition that you received for the Southern District meeting in March. The content of this, you will observe, is substantially that of the original paper, with the exception of the inclusion of some more accurate and more recent data than I had when the original was written. I hope the delay in furnishing you this revised copy has not caused you any inconvenience.

Yours sincerely,

M. KING HUBBERT
